HIGH QUALITY, FAST DELIVERY, COST EFFICIENCY

Micropol sells various types of adapters used to connect two or more connectors. Depending on whether you have Single mode or Multi mode fiber in your network, the adapter is supplied with different types of sleeves. We also have adapters for POF (Plastic Optical Fiber).

Simplex, duplex and quad adapters are available in plastic or metal, with or without flanges, and in horizontal and vertical mount styles. All come with a choice of zirconia split sleeves (diagonal or straight split options available) for Single mode, or with phosphor bronze straight split sleeves for Multi mode. Housing is available in a variety of colors. The SC simplex plastic adapter has an optional shutter. The SC adapter series is also available in metal housing, with square or rectangular flange types. Custom hook color and mount styles are available.

FEATURES

- Compact design
- High precision alignment
- Low insertion and return loss
- Telcordia, ANSI, TIA/EIA, NTT
- Choice of metal or plastic housing
- Mount styles with or without flanges
